

Is Wearing Your Face Mask Causing Burning, Itching, Painful or Watery Eyes?

SOOTHE YOUR EYES WITH **VITEYES®** **TEAR SUPPORT**

When wearing face masks, exhaled air goes through the top of the mask and dries the eyes causing the natural tears in your eyes to evaporate.

Symptoms of occasional dry eye include redness of the eyes, a stinging or burning sensation, feeling like you have something in your eye, difficulty wearing contact lenses, difficulty driving at night, watery eyes or eye fatigue.

VITEYES® TEAR SUPPORT

Formulated with omega-3, flaxseed, borage seed oil, and turmeric to help:

- Maintain healthy tear film in the eye
- Stimulate tear production
- Act as anti-inflammatories in the eye

VITEYES Tear Support is the perfect formulation to help provide eye comfort and fight against occasional dry eye from wearing PPE!

Taking a nutritional supplement can help relieve occasional dry eye from the inside out!

SOOTHE IRRITATED & FATIGUED EYES WITHOUT THE DROPS!
